## THE SIGNIFICANCE OF STREET FURNITURE

Choosing street furniture is the chance to completely redefine urban space with hundreds of styles, colors, layouts, and materials.

---

## E X T E R I O R

### LOOK FOR HIGH-QUALITY

Choose furniture that is made from high-quality materials. They will be more comfortable and will last much longer.

---

Appropriately selected and placed furniture can draw people to outdoor spaces and add to the pleasure of using these spaces; the main challenge is getting them outdoors, with the aim of making them feel welcome, relaxed, and involved.

---

## OUR COMPANY MISSION

The mission of our company is to follow "Recreation without borders" motto. We mean no borders when it comes to age, performance, culture, and geography. We believe that this mission is the driving force behind the continuous development of our organization.

## SEATINGS

Being able to sit within a city landscape provides an opportunity to pause, and also a tactile and more intimate contact with a place than one has when standing or walking.

## WASTE RECEPTACLES

A waste receptacle, should be convenient to use and easy to maintain, but it also often accommodates other activities - people rest packages on them, meet people next to them, and so on.

## PLANTERS

Planters are way of bringing colour and life to urban streetscapes, retail centres and large foyers. Although used primarily for decorative purposes, street planters are also used to demarcate outdoor seating areas in restaurants and offices.

## TREE GUARDS

Tree guards provide a physical barrier between a tree and our sometimes harsh urban environment. They reduce soil compaction, shield the trunk from physical damage, and prevent pet waste from entering the tree pit.

## BIKE RACKS

Bicycle racks are very important elements of the streetscape. They have to be aesthetic and functional projects for those who travel by bike.

## BOLLARDS

These are vertical barriers and are one of the most unobtrusive ways of preventing access by vehicles enroaching on to pedestrian areas. They can define areas in the streetscape and provide an attractive design element.

## ARBORS

High-quality urban furniture for arranging parks and recreation areas to eat or to enjoy moments of relaxation away from the sun. The outdoor houses are a piece of furniture that, in all shapes and sizes, remains a pleasant combination of useful and pleasure for children and adults.

## CUBE

# ARBOR CUBE

The new ARBOR CUBE collection is our answer to the needs of a changing world in the field of ecology. The devices in the ARBOR CUBE collection are made of 100% recycled material.

Does not require maintenance

Chemical and weather resistant

High durability, estimated at 40 years of use

Waterproof

Resistant to oils, brines, acids, and salt water

Does not conduct electricity

Color resistant to discoloration thanks to the UV filter

It is suitable for reprocessing through the recycling process

It does not split, which guarantees safe use

Environmentally friendly - non-reactive with soil or water
